### WELCOME TO SIMIODE AND OUR NEWSLETTER

---

SIMIODE - Systemic Initiative for Modeling Investigations and Opportunities with Differential Equations is about teaching differential equations using modeling and technology upfront and throughout the learning process. Learn more at our dynamic website, [www.simiode.org](http://www.simiode.org). SIMIODE is now entering its sixth year as a community, its second year of National Science Foundation funding, and the fifth year of this newsletter. Time flies when you are having fun!

SIMIODE is a 501(c)3 nonprofit organization, based in Cornwall, New York in the United States. Contact: [Director@SIMIODE.org](mailto:Director@SIMIODE.org).

### SIMIODE IS A COMMUNITY OF PRACTICE

---

We are pleased to announce that SIMIODE is a [Community of Practice](#) in the broad sense as defined by [Etienne and Beverly Wenger-Trayner](#). SIMIODE is more than a set of resources and ideas for using modeling to motivate and teach differential equations. SIMIODE is Community and welcomes conversations, blogs, and exchanges about practices, examples, experiences, materials, stories, student feedback, successes and improvements, and much more. Join us at [SIMIODE Community of Practice](#) and engage in meaningful conversations and exchanges.

### NSF FUNDED SUMMER 2019 DEVELOPER AND PRACTITIONER WORKSHOPS

---

SIMIODE invites applications for SIMIODE Summer 2019 Workshops Sponsored by the National Science Foundation and SIMIODE, July 2019, at George Fox University, Newberg OR USA

18-21 July 2019 4-Day Intensive SIMIODE Developer's Workshop

Those with experience and ideas for writing differential equations modeling scenarios for classroom use are encouraged to apply. DEMARC (Differential Equations Model and Resource Creators) Fellows who are selected for this workshop are fully funded, including travel up to \$600, room & board, and a stipend up to \$600. Applicants are asked to provide evidence of successful modeling scenario development. The workshop will provide training and support for creating new modeling scenarios.

21-26 July 2019 5-Day SIMIODE Practitioners Workshop

Ideal for those who would like to learn more about how to foster a modeling-first approach in the classroom. Workshop includes hands-on demonstration, group discussions, and activities facilitated by experienced faculty. MINDE (Model INstructors in Differential Equations) Fellows selected for this workshop have a \$300 registration fee and are provided all materials and room and board for 5 days.

Complete information and application process for respective workshops can be found here: [DEMARC](#) and [MINDE](#).

### SCUDEM IV 2019 SEEKS HOST SITES

---

SCUDEM IV 2019 will take place in local sites around the world on 9 November 2019. We are seeking local site host coordinators for this event. SCUDEM, which stands for SIMIODE Challenge Using Differential Equation Modeling, offers teams of three undergraduate or high school students three modeling problems. Each team selects the problem of their choice and works on it for a week before Challenge Saturday, 9 November 2019. Student teams with their coach travel to a local site (your school perhaps) near their home campus

for a day of collegial sharing. Here they submit an Executive Summary for judging, work on an additional feature for their problem, participate with faculty in an active use of SIMIODE Modeling Scenarios during a first portion of a Faculty Development program, enjoy the fun of team MathBowl, make a 10 minute presentation of their model results, and get immediate feedback on their work by faculty judges.

Faculty coaches and other members of visiting faculty participate in a two part Faculty Development workshop in which they experience (with students) SIMIODE Modeling Scenarios and discuss using modeling in their differential equations course. During the closing ceremony awards (Outstanding, Meritorious, and Successful) are presented.

Host sites receive a check of one half the visiting teams' \$100 US registration fees in support of their hosting, while SIMIODE provides ALL materials for success on Challenge Saturday. In addition, host site teams are refunded their own registration fees. SIMIODE provides massive email lists (over 85,000 mathematics faculty members) for local invites, recruiting letter materials, and an attractive flyer which can be personalized to help bring teams to the local campus site for SCUDEM. We have a complete [Local Site Host Coordinator Guide](#) and a special Group in SIMIODE for hosts to keep them informed and permit sharing of helpful ideas and approaches.

Team registration opens on 1 September 2019.

Be sure to check out the [convincing videos](#) in which students and faculty share their enthusiasm and experience in engaging in modeling with differential equations in SCUDEM.

There are no registration fees for SCUDEM IV 2019 in developing countries. This is our way of reaching out and supporting colleagues from these regions.

We invite all to join the [Facebook Group - SCUDEM Mathematical Community](#).

## PUBLISH YOUR CLASS EFFORTS IN SIMIODE

---

If you are teaching differential equations of some sort you have probably written and assigned projects. Consider publishing your materials online in SIMIODE using our peer reviewed, double blind referee system.

SIMIODE maintains a [double-blind, peer-reviewed process](#) for quality online publication of Modeling Scenarios and Technique Narratives. However, we encourage authors to submit their ideas at any stage of development and/or class projects for immediate feedback of a less formal nature. We will render constructive support and encouragement as well as technical feedback. In the past the SIMIODE Director, Brian Winkel, as Founding Editor of the journal *PRIMUS*, found this to be a very good way to foster confidence, help prospective authors contribute to the broader community, and get their ideas published. Please drop us a note with your ideas and/or materials to [Director@simiode.org](mailto:Director@simiode.org). We will respond quickly!

You can see how to submit your materials [here](#). What you do is important to your students, but it is also worthy of sharing with colleagues and their students. Step up and write up your projects for SIMIODE. You will have an online refereed publication at SIMIODE. You will be pleased to know others are using your ideas, building on your success, and enjoying what you share with your students. So, what are you waiting for? Just do it!

One purpose of SIMIODE is to offer colleagues solid, refereed teaching material on which they can base a modeling first course in differential equations. Thus publishing new ideas and activities for students is a main goal of SIMIODE.

However, it is reasonable to ask yourself, "Why should I prepare, submit, and publish in SIMIODE?" [Here](#) we give you many good reasons to publish in SIMIODE. Check them out and see that many fit you. Then join us by sending us your efforts.

---

## COMMENTS HELP CREATE COMMUNITY AT SIMIODE

---

For each Resource posting in SIMIODE community members have the opportunity to post COMMENTS. This is strongly encouraged as it will build conversations which will connect colleagues, improve material, and foster community. Any posted Comment will be emailed to the author of that resource and conversations can then begin.

Giving feedback, reactions, and corrections to authors is very important for the individual author and the wider SIMIODE community. If you visit and scan/read or actually use a Modeling Scenario or Technique Narratives please offer comments. You may even wish to upload a new resource which has significant added-value. If so then contact [Director@simiode.org](mailto:Director@simiode.org) to inquire how you can do this. We would welcome such efforts.

---

## CALL FOR TECHNIQUE NARRATIVES FOR SIMIODE

---

We publish more and more Modeling Scenarios all the time. Indeed, these are the core of support material for colleagues planning to do more modeling in support of learning differential equations.

It is also important to offer colleagues and their students what we call Technique Narrative activities. These are closer to the traditional material of solution strategies and methods offered in differential equations courses and may help faculty in a more comfortable transition to using modeling in their teaching. SIMIODE offers a small but growing list of [Technique Narratives](#). As with Modeling Scenarios, we have a Student Version in which the STATEMENT of the problem is offered with supporting materials and we have the Teacher Version in which COMMENTS are offered to assist in planning, teaching, and carrying out the modeling activity.

A good example of a Technique Narrative is found in [1-002-S-Text-IntegratingFactor](#). Here the solution method of Integrating Factor is illustrated and exercises are placed in the context of science and engineering applications so the student can see not only the technique, but the worth of using the technique in context.

All Technique Narratives are FREE, downloadable, and customizable under the most generous Creative Commons license. [Visit here](#) to see them all. The list is small, too small, so we request that you share your approaches to solution methods through writing them up for publication, just as you would a [Modeling Scenario](#). They are fully searchable by topics and area of interest to you.

[Return to Table of Contents](#)

---

## CONSIDER REFEREEING MATERIALS SUBMITTED TO SIMIODE.

---

The high quality material in SIMIODE needs scrutiny, review, and collegial suggestions for improvement. Please consider refereeing materials submitted to SIMIODE for online publication. We use a double blind, peer reviewed [manuscript management system](#) to insure high quality reviews. You can sign up as a referee to review materials and help make quality SIMIODE offerings for users at our [SIMIODE FastTrack Page](#). Thank you.

---

## FREE ONLINE DIFFERENTIAL EQUATIONS TEXTS

---

We offer [annotated listings of FREE online differential equations texts](#). This is one of the more popular sections when colleagues visit our site. There are over two dozen such texts. Colleagues have shared their materials in complete text form, often with traditional course structure, as well as rich sets of resources from which to teach. Most texts offered cover the basics of technique and offer exercises. Many offer modeling applications. Your students will appreciate a FREE text and you might enjoy the fresh approaches taken in such presentations. Try it!

This is one of our more popular "landing sites" for visitors to SIMIODE.

Ideally we believe one could save students lots of money by using a FREE online text along with SIMIODE Modeling Scenarios. Make the move for your students and enjoy the excitement of using modeling to motivate learning in your differential equations course.

[Return to Table of Contents](#)

---

## SOURCES FOR YOUR OWN MODELING SCENARIOS

---

SIMIODE offers [potential modeling scenario ideas](#). There are hundreds of these! These are materials, thoughts, pointers, summaries, articles, etc. to encourage and support your modeling scenario ideas. You must be registered and signed in to view these resources. Consider these ideas and use them to design your own modeling scenarios for your students and then publish this material in SIMIODE.

Of course, you can publish your own source materials, perhaps ideas you have not been able to get to, but want to or wish to engage with others in producing a Modeling Scenario. Just upload them for all to see. Use the "Start a new Potential Scenario Idea" button and contribute.

## SIMIODE IS A 501(C)(3) TAX EXEMPT ORGANIZATION - PLEASE SUPPORT US

---

SIMIODE is a 501(c)(3) tax exempt organization and can accept tax deductible contributions from individuals, corporations, and foundations.

Think of your differential equations course and how applications and modeling would have been so beneficial to motivate you and your fellow students. SIMIODE is your chance to support this approach for students now. You can see students value this approach in our [SCUDEM videos](#). Join us and contribute your support, financially and intellectually.

As a mathematics education organization we are open to receiving public support. In fact, we need this support to exist, so please contribute. You can contribute financial support for SIMIODE in whatever amount you feel appropriate at [Donate](#). See our [Mission Statement](#) for reasons why you should support SIMIODE. All contributions are tax-deductible. For ANY contribution we will send you a letter of appreciation, acknowledging your contribution, for tax purposes. Please provide your email for this letter. Thank you.

You may confirm our NonProfit status at the official listing of SIMIODE in the [IRS Organization List of NonProfit Organizations](#).

[Return to Table of Contents](#)

---

## WORDS FROM THE DIRECTOR

---

SIMIODE is a [community](#) which is alive, vibrant, and rich in resources and individual talents to assist colleagues who wish to teach differential equations using modeling to motivate students. There are a number of ways you can add to the community:

**Contribute materials.** You can learn more about this at our [Author Information](#) section and get even more details once you have signed into SIMIODE. There you will find types of materials and instructions on how to contribute and begin the process leading to publication in SIMIODE.

**Visit our [SIMIODE Blog](#)** for thoughtful commentary or form your own blog.

**Register to referee and review submitted materials.** Good scholarship merits attention and our double-blind, peer-referee system affords quality reviews of submitted

materials. Please, visit our [Manuscript Management system](#) and register as a referee.

**Post slides from your presentations or talks.** When you give a talk you can post your slides, details of the talk or meeting, and comments at [Resources: Presentations](#). Now that you have spread the word beyond the SIMIODE community bring it back home for your fellow SIMIODE members to see.

**Attend a MAA Contributed Paper Session at MathFest or an AMS Special Session at JMM** devoted to modeling in differential equations course work and see what others are doing. Step up after the talk and engage the speaker. You will have a new collegial friend!

Attend one of our **SIMIODE Workshops and Minicourses** at national mathematics meetings.

**When you attend a talk** on an application of differential equations encourage the presenter to consider sharing these ideas with the SIMIODE community. Encouragement helps young faculty expand their reach.

As always please let us hear from you with your concerns, your news, and your activities.

Contact us at [Director@SIMIODE.org](mailto:Director@SIMIODE.org).
